EXAMINER

PEDDER, DENNIS H

ART UNIT PAPER NUMBER

3612

DATE MAILED: 04/26/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/784,653	Applicant(s) SCHONEBECK ET AL.	
	Examiner Dennis H. Pedder	Art Unit 3612	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 April 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-25 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-8 is/are allowed.
- 6) ☒ Claim(s) 9-13 and 15-25 is/are rejected.
- 7) ☒ Claim(s) 14 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 9-10, 13, 15, 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Oehrle et al.

Oehrle et al. has sealing profile 6 with reverse side attached to a vehicle 2, sealing side opposite, protruding portion at upper end of the sealing side and sealing to the vehicle 2 at this upper junction, sliding strip 5 at the front of the sealing side and spaced from the protruding portion at upper end and connecting member 4 that both contacts the sliding strip 5 and is spaced from the sealing surface 6.

As to claim 23, strip 5 is different than surface 6.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any

Art Unit: 3612

evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 11-12, 24, 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oehrle et al. in view of Hermann et al.

It would have been obvious to one of ordinary skill to provide in Oehrle et al. a form-locked sliding strip as taught by Hermann et al. at 15 in order to assure retention.

As to claim 12, the sliding strip is always recessed from the sealing surface.

As to claim 24, the sliding strip of Hermann et al. protrudes and is recessed in all conditions .

6. Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Oehrle et al. in view of Schmidhuber et al.

It would have been obvious to one of ordinary skill to provide in Oehrle et al. a wedge shaped configuration to a panel as taught by Schmidhuber et al. in order to enhance the sealing effect.

7. Claims 17-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohout et al. in view of Oehrle et al.

Kohout et al. has first and second sealing profiles commonly pressed to each other to seal, and connecting member 11 protruding between. Oehrle et al. teach a reverse side of the sealing profile for attachment to the vehicle and a sealing surface at upper end in juncture with the vehicle 2, and a sealing strip 5 on the sealing side of the profile. It

Art Unit: 3612

would have been obvious to one of ordinary skill to provide in Kohout et al. a sealing profile as taught by Oehrle et al. in order to assure quality retention as well as to reduce sliding friction.

As to claim 18, Kohout et al. has a longitudinal guide.

As to claim 19, the cover of Kohout et al. is vertically movable and displaceable over a stationary roof 6.

Remaining claims are self-explanatory.

Allowable Subject Matter

8. Claims 1-8 are allowed.

9. The following is a statement of reasons for the indication of allowable subject matter:

There is no teaching of record in this application to cover a recessed area of a double protruding seal with a sliding strip as no contact would occur in this region, unlike the patent to Moore wherein the double seal with sliding strip at 23/22 is applied to a non-recessed region between the seals.

10. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3612

Response to Arguments

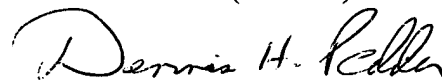

11. Applicant's arguments filed 4/15/2005 have been fully considered but they are not persuasive. Please see the detailed rejection above.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis H. Pedder whose telephone number is (571) 272-6667.

The examiner can normally be reached on 5:30-2:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn D. Dayoan can be reached on (571) 272-6659. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
